

# STAYING INFORMED COVID-19 PANDEMIC

## SITUATION on May 6<sup>th</sup>, 2020 CHSLD Heather

In order to keep families well informed of the evolution of the situation in our establishment, here is the situation today:

4 positive cases <sup>1</sup>	stable
1 death	stable
3 positive employees	increase of 1

We would like to reiterate our sincere condolences to the family who lost a loved one. We are all heart with you. We will never forget.

### Measures in place

- The visit promised by the government took place on April 11<sup>th</sup>, 2020 and the designated visitor was satisfied with the elements put in place
- We work in collaboration with our doctor as well as our partner the CISSS de Lanaudière.
- Personal protective equipment is still rationed, but available in sufficient quantity for our staff and those of CISSS.
- We have given additional training to our staff.
- Our site coordinator is on site to direct operations and organize teams. She also assists teams when needed.
- We carry out daily management of employees with symptoms. They are placed in quarantine according to recognized guidelines.
- Admissions from hospitals are stopped for an indefinite period.
- We have created cold and hot zones according to ministerial directives and have distributed staff members in these separate zones. These employees cannot walk from one area to another.
- Elevators will be dedicated to staff members according to these areas.
- A security guard control the access 24 hours a day.
- We have gone beyond the directives in the last few weeks, for example, 14-day mandatory isolation for new admissions.

<sup>1</sup> IMPORTANT NOTE : The calculation of positive cases includes the number of deaths.

## **Reinforcement for our teams**

If necessary, CISSS personnel will be deployed to replace our fallen personnel and we appreciate it.

These people coming from the CISSS are trained professionals who are aware of the risk of not respecting infection prevention guidelines. If in doubt, and even if they are asymptomatic, our employees and those from the CISSS are and will be tested and removed for a quarantine period, should the case arise.

Training and tools aimed at supporting people with or without clinical experience on temporary assignment with us have also been developed by the MSSS. Helping staff will therefore be able to adapt more quickly to the tasks to be carried out in our establishment.

## **Hot and cold zones**

Residents who have contracted COVID-19 are placed in a dedicated section of a unit, called a "hot zone," to prevent them from spreading the virus to other residents. Residents suspected of being carriers are placed in isolation in a dedicated area until the results of the tests are obtained. Depending on the number of cases in the facility, there may be hot and cold areas on each floor. The zones are clearly separated and the personnel assigned to the hot zone can only work in this zone.

## **Infection prevention**

Since the start of the pandemic, we have applied all the health measures recommended by the MSSS and the National Institute of Public Health, and even more. We have rigorous measures and we are monitoring them closely.

We have active support from the CISSS infection prevention counselors to help contain the outbreak.

## **Online Video Calls with residents**

Please continue to communicate with your loved ones. It creates beautiful moments for them. To make an appointment, please contact [loisirs.rawdon@groupeasantearbec.com](mailto:loisirs.rawdon@groupeasantearbec.com).

## **Quality of care and services**

The COVID-19 measures and protocols in place have obviously changed the dynamic at the Centre. However, residents are receiving the care they need and our kitchen is running as usual. That said, it is possible that the usual way of doing things has been adapted in order to respect social distancing. Medication and meals may be brought in at a different time, but **we have the necessary staff** to provide care and services for all our residents.

Our managers, health staff and support employees are redoubling their efforts to ensure professional service, despite the circumstances.

## **Family Information Line**

We know that many of you have tried to call the CHSLDs without success. For this reason, we have set up a single number for all CHSLDs to reach us more easily. Contact us from 9 a.m. to 9 p.m., 7 days a week, at **514-820-7303**.

Continue to monitor the messages that will be sent by email, on our website and on our Facebook page.

## **Thank you for your support**

We are aware that this situation causes you a lot of worries and stress. Rest assured that all measures are in place, both for staff and residents. We thank you for your support and understanding during these difficult times.
